

Solving problems before they become problems

Solspec combines the power of artificial intelligence and expert consultants to keep your project hazard free

When the unexpected happens...

You fear for the safety of people and communities

You worry about the cost of repairs

You wonder how to prioritize your work

The land is becoming more volatile because of...

Unique Soil Conditions

Route selection is becoming more limited

Increasing populations

How does Solspec benefit our customers?

1022

Total Potential Slips Identified

\$246,000,000

Total Estimated Savings

99%

Our accuracy compared to boots on the ground

Increase safety by reducing foot traffic on site

Know where to send your crews first

How do we do it?

1

Drones or planes map your asset

2

Our team of scientists identify problems

3

We connect you with geohazard experts

Our Areas of Expertise

- Predict
- Assess
- Detect

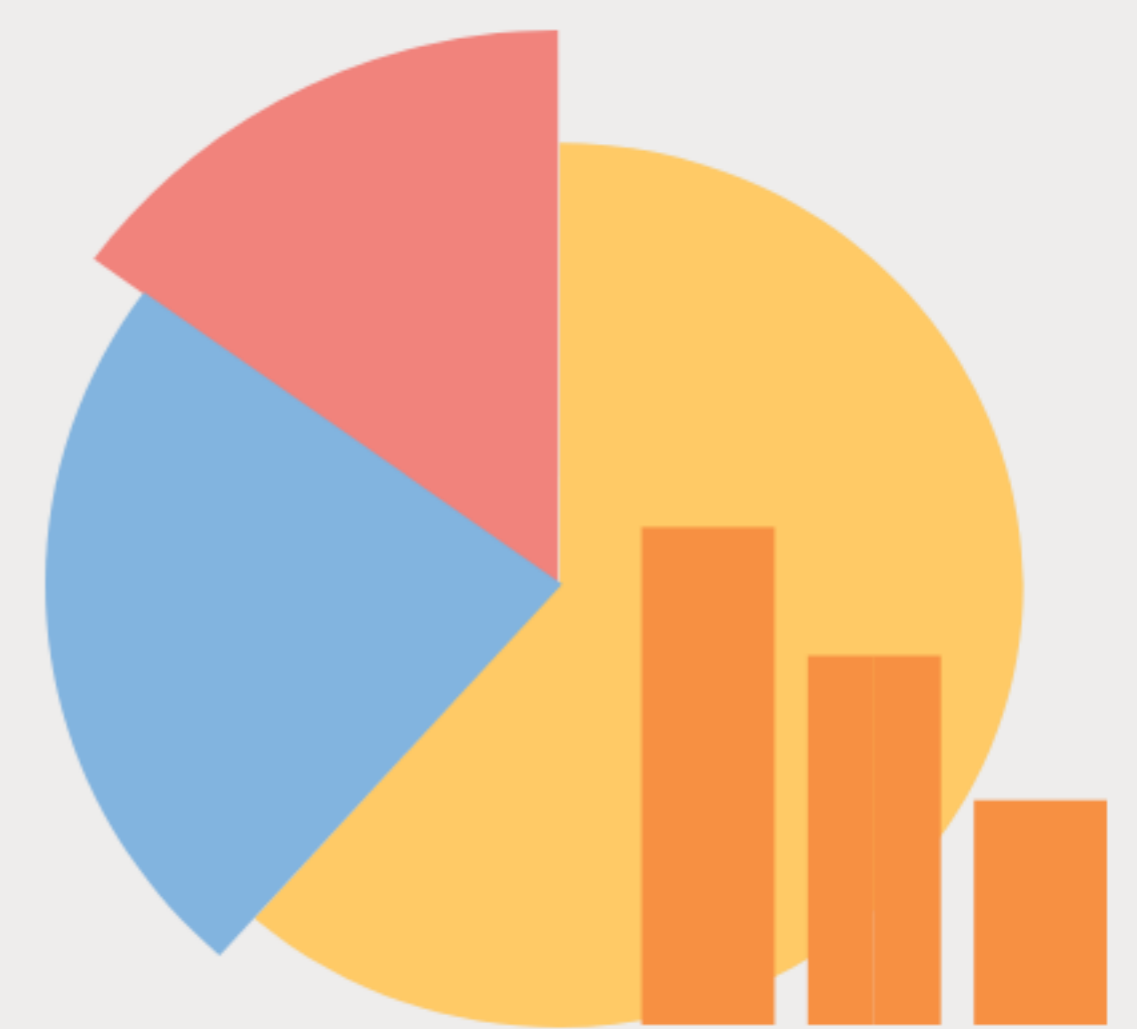

- Predict
- Assess
- Detect

- Assess
- Detect

We give you 2D maps, 3D models and simplified reports so you can precisely identify problems and prioritize your efforts.

We don't do it over time, we do it overnight
